

UTILITIES WORLD
SMART REVENUE MANAGEMENT SOLUTIONS

About Us

Utilities World is a proudly South African company and a pioneer in the deployment of end-to-end solutions tailored for utility management in both private utilities and municipalities. The integrated platform developed provides for the modular deployment of solutions.

Our solutions include but are not limited to the following:

1. Transaction Revenue Systems
2. Revenue Protection
3. Core Vending and Distribution Solutions
4. Data Mining and Advanced Reporting
5. Meter Audits
6. TID Rollover
7. Data Cleansing and Normalisation

Our understanding of the challenges faced in South Africa, including the rural and peri-rural areas allows us to provide for the unique requirements of our clients on an affordable and cost-effective basis.

Prepaid World, Creative Software and Intellimeter provide the technological backbone that facilitates and supports our integrated and modular technical utility management solutions that facilitate a host of services that include the provisioning of hardware, token generation, vending and settlement and reconciliation.
